

WASTE MANAGEMENT STATEMENT

Naylor Nutrition Group Limited is a food manufacturing and processing company registered in England and Wales with reg. number 13210799 located in Spalding, England.

We at Naylor Nutrition are actively committed to using resources in a net-beneficial way and implementing a circular economy strategy throughout our activities. Our main goal is to cut down on the amount of raw materials that the company uses overall. In line with this, our goal is to maintain maximum use of products and materials throughout their lifecycles. Additionally, we advocate for recycling and the advantages of using used materials. However, if disposal is the only choice, we'll try to do so in a fair manner that respects the environment. In order to accomplish this aim we:

- When possible avoid, then minimise, waste streams of high volume and high cost.
- Adopt solutions that minimise our plastic impacts and reduce the amount of plastic we use, especially single-use items.
- Develop Site Waste Management Plans (SWMP) for each site in order to accommodate effective waste management and minimise the risk of pollution.
- Audit potential Waste Management Suppliers pre appointment to ensure they are of an acceptable standard.
- Give written guidance and information to staff to facilitate their participation in the recycling of their waste.
- Encourage suppliers to design packaging materials in accordance with a circular economy perspective.
- Encourage the purchase of products with recycled content; also select products and materials with recycling potential.
- Minimise waste by encouraging the exchange, and reuse of equipment and materials amongst departments.
- Have an appointed employee taking logs of how the waste is managed and disposed of.

Naylor Nutrition is aware of how important it is to manage waste materials properly in order to avoid pollution and guarantee that environmental regulations are being followed. To properly uphold its Duty of Care obligations, Naylor Nutrition makes sure to stay updated on changes to the legal frameworks in relation to Waste management. Naylor Nutrition regularly communicates with the regulator to make sure the best practices are followed, and legal obligations are met. We promote cooperation and coordination among our employees, subcontractors, and clients in order to achieve our shared objective of decreasing waste at its source and, whenever possible, reusing and recycling our waste. We will acknowledge, respond appropriately, and take into account of the views of the public and any other interested parties with respect to our operations. In addition, this policy statement will be communicated to all persons working for and on behalf of Naylor Nutrition.

If you have any questions or concerns don't hesitate to contact our Technical Manager or Farm Secretary.
